

AM & FM stations claimed that Satellite Radio will never catch on because the consumer will never pay to hear radio service. Well, it sounds like to me that they are getting worried now. Then on top of it, they want the government to save them from any competition that pops up. What a good setup for them to have the government to outlaw or limit their competition. I'm willing to pay for a "Better" service and better programming from Satellite radio and when did competition become "Anti - American" ??

Thank You.
